

# ALLEY BACK STOPS

---

The Box S Fence Alley Back Stop is the perfect remedy for cattle backing out of the lead-up to your chute. Made of 14 gauge steel tubing and powder coated for durability, this back stop mounts directly to your alley fence or to a board on the side of the fence, making it easy to place at any height. Cattle can walk through it to get in, but once it is closed, they cannot back out.
